Data Science Expertise to Support Time-Critical Analysis

HaystackID's team of data science authorities has the expertise and experience to support the challenging and complex tasks associated with the detection and identification of sensitive data. Key team skill sets organized around the data science disciplines of analysis and building include conceptual and practical experience with:

- Algorithms and Models
- Analytics
- Coding
- Databases
- Frameworks and Libraries
- Knowledge of Key Business Domains

From data scientists to machine learning engineers and from data architects to application engineers, our team provides insight and intelligence to drive data-driven decisions to detect and identify sensitive data.

Targeted Cybersecurity Support for Law Firms and their Corporate Clients

Augmenting, complementing, and enhancing traditional cybersecurity investigations and evaluations, ReviewRight Protect's comprehensive data breach discovery capability coupled with targeted personally identifiable information (PII), protected health information (PHI), and disclosure review services make it the discovery service of choice for law firms and their corporate clients seeking to determine exposure, mitigate risk, and ensure compliance with security and data breach notification requirements.

A Powerful Combination

When used in combination with ReviewRight Virtual® and ReviewRight Match®, ReviewRight Protect™ allows for the mobilization of the best qualified and immediately available reviewers for time-sensitive post-data breach reviews and inadvertent document disclosures while providing a secure remote review and communications infrastructure for required sensitive data reviews and notifications.

About ReviewRight®

ReviewRight is a specialized set of document review services from HaystackID designed to help law firms and legal departments quickly and accurately learn from their data to make the right decisions for positive and quality investigation and litigation outcomes. These specialized services address essential eDiscovery needs for complex, data-intensive reviews.

- **ReviewRight Virtual**® (Secure Remote Review)
- **ReviewRight Match**® (Reviewer Qualification and Sourcing)
- **ReviewRight Protect**™ (Sensitive Data Discovery and Review)
- **ReviewRight Translate**® (Foreign Language Review)
- **ReviewRight Manage**® (Managed Review)
- **ReviewRight Host**® (Review Hosting)
- **ReviewRight Automate**® (Technology-Enhanced Review)

Within this offering portfolio, HaystackID's sensitive data discovery, post-data breach review, and incident response notification capability is enabled by ReviewRight Protect.

Powerful enough to be used individually and unmatched in capability when integrated, HaystackID's ReviewRight services are the first choice and best choice for document review services by the world's top corporations and leading law firms.
